Subject: Workshop Ideas

Ken & Melissa

I have what could be a great idea and benefit all. At the 3 workshops (Petaluma, Gualala & Pacifica) the public was asked to fill out "Public Comment Sheets." These pieces of information are going to be shared with stakeholders and staff in the MLPA process. Unlike the "public comment" link on the MLPA website this information is not shared presently with the general public.

Although this idea of mine would take a little work and maybe an extra staff member I feel it necessary to share the ideas of all with the general public as well. Therefore for the betterment of the process and future study regions...

I feel it necessary to have a tab on the MLPA website labeled "WORKSHOP COMMENTS." These general comments should be shared by all so one can see the opinions and recommendations of others. It would educate others in the system, sharing ideas and opinions. If the "Public Comment Sheets" have to be processed for staff...then that really is not extra work to share with all.

Thanks for your time, again...

Arch Richardson
